Manual for VIM/LaTeX/Terminal

Ibrohim Nosirov

April 8, 2020

1   Terminal/BASH

The terminal is in essence, the computer. Here you can do pretty much anything you like, from running inventory on your computer to writing malware to take down the 1% ☺. I don't think we'll go that far with this manual. Let's just stick to the basics.

`ls`   lists files `cd` change directory `cp []`
